PROJECTS

1. Membership Registration System for Global Life Chapel

This system was designed to eliminate the manual way of registering members by going digital (<https://github.com/Sir-Nyabz/GLC.git>)

2 Global Life Chapel Website

A website to give the church an online presence and also enable easy access to information and announcements about church programs and other happenings (<https://sir-nyabz.github.io/global-life/>)

3 An interactive administrative dashboard

This displays both the performance of customers across the country (https://github.com/Sir-Nyabz/MYHEALTHCOP_ASSESSMENT.git)
